1. 下載Win32 Disk Image軟體並解壓縮

The screenshot shows the SourceForge project page for Win32 Disk Imager. The browser's address bar displays the URL `sourceforge.net/projects/win32diskimager/`. The page features the SourceForge logo and navigation links such as 'Help', 'Create', 'Join', and 'Login'. A search bar is located on the right side of the navigation bar. The main content area includes the project title 'Win32 Disk Imager', a description 'A Windows tool for writing images to USB sticks or SD/CF cards', and the creator 'Brought to you by: gruemaster, tuxinator2009'. A 'Project of the Month' badge for March 2014 is visible. The page also shows a star rating of 4.5 stars based on 112 reviews, with 42,624 downloads this week and a last update on 2018-06-07. A large green 'Download' button is prominent. Below the download button, there are tabs for 'Summary', 'Files', 'Reviews', 'Support', 'Wiki', 'Feature Requests', 'Bugs', 'Code', 'Mailing Lists', and 'Blog'. The 'Summary' tab is selected, displaying the program's purpose and usage instructions. A warning section at the bottom of the summary tab advises users to write to a temporary file first to avoid issues with USB floppy drives. A 'Recommended Projects' section at the bottom right lists 'Rufus'.

This program is designed to write a raw disk image to a removable device or backup a removable device to a raw image file. It is very useful for embedded development, namely Arm development projects (Android, Ubuntu on Arm, etc). Anyone is free to branch and modify this program. Patches are always welcome.

This release is for Windows 7/8.1/10. It will should also work on Windows Server 2008/2012/2016 (although not tested by the developers). For Windows XP/Vista, please use v0.9 (in the files archive).

Warning: Issues have been reported when using to write to USB Floppy drives (and occasionally other USB devices, although very rare). While this has been fixed in v1.0, it is highly recommended that before an image is written to a device, the user should do a Read to a temporary file first. If this fails, please report the failure along with your system information.

3. 將Win32 Disk Image安裝後開啟

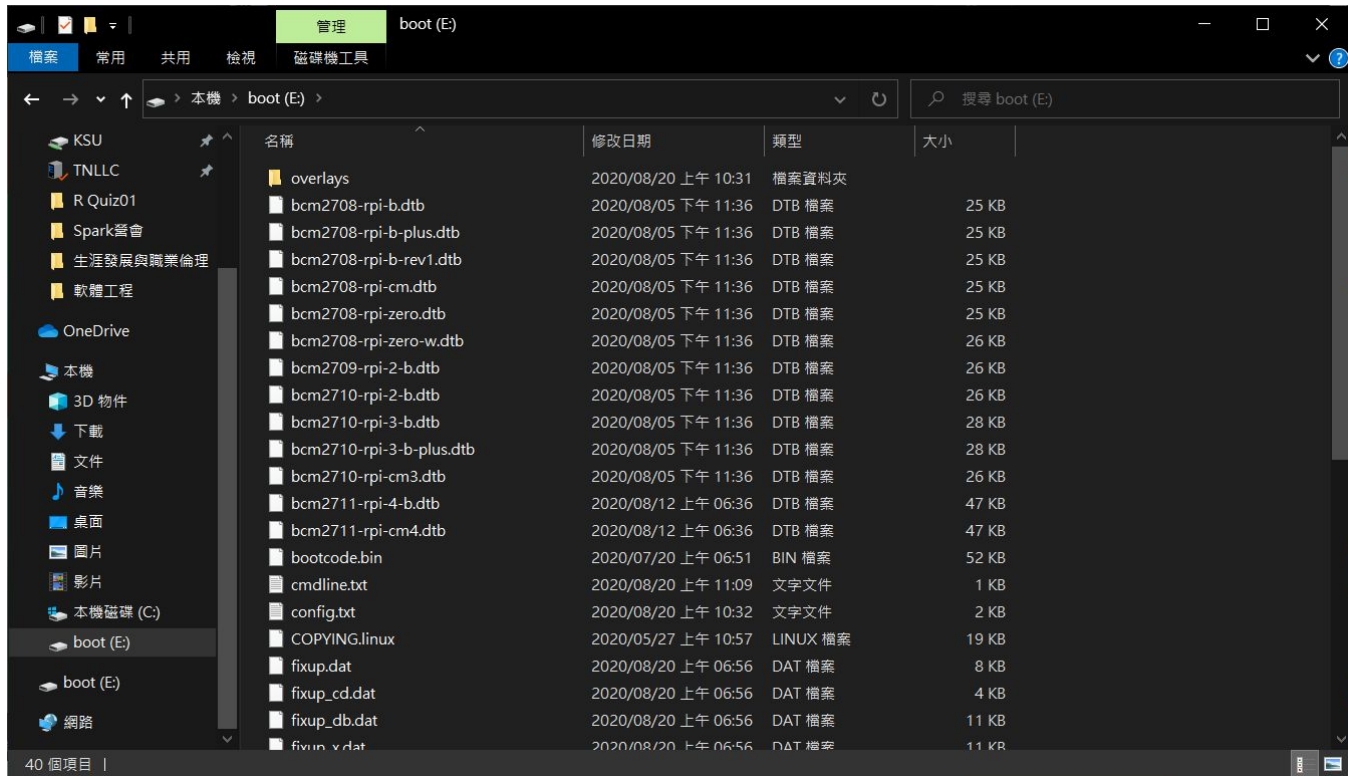

4. 將映像檔選擇並確認裝置

5. 開始寫入資料到裝置中

6. 確認SD卡內容-boot(E:)

7.SD卡內新增空白ssh.txt

8. SD卡內找到cmdline.txt, 新增ip到最後一行

```
*cmdline.txt - 記事本
檔案(F) 編輯(E) 格式(O) 檢視(V) 說明
size.sh splash plymouth.ignore-serial-consoles ip=192.168.2.105
第 1 列, 第 225 行 100% Unix (LF) UTF-8
```
